***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-6, 8, 9, 11, 13-19 and 21-26 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. The claimed invention is not within the technological arts. The claims do not positively recite computer structure, which would place them with the technological arts. See *In re Toma*, 575 F.2d 872, 197 USPQ 852, (CCPA 1978).

To overcome this 101 rejection, the Examiner respectfully suggests positively reciting Applicant(s) "computer" somewhere within the body of the claim(s). Such language may be seen in claims 7 and 10 of the instant application.

***Allowable Subject Matter***

Claims 7 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments, with respect to the prior art rejections have been fully considered and are persuasive. The rejections of December 5, 2002, have been withdrawn.

***Conclusion***
